Profile Summary

Highly motivated BCA student specializing in Analytics with hands-on experience in data analysis, AI automation, dashboard development, and full-stack web technologies. Skilled in Python, SQL, Power BI, ReactJS, and automation tools like n8n and Selenium. Experienced in building interactive dashboards, automating workflows, scraping and analyzing data, and developing AI-integrated solutions.

Education

Year	Qualification	Institution	Percentage
2021-2022	Class XII (Physics, Chemistry, Biology)	Central Academy Sr Secondary School, Jodhpur (Rajasthan)	92.8%
2020-2021	Class X	Central Academy Sr Secondary School, Jodhpur (Rajasthan)	95.6%

Internships/ Experience

DATA ANALYST & AI AUTOMATION ENGINEER

Intern at CSI(Cyber Secure India), Remote

Jan 2025 – March 2026

- Developed a Threat Intelligence Dashboard using D3.js for real-time cybersecurity visualization.
- Built AI-powered automation workflows in n8n integrated with OpenAI APIs for content rewriting.
- Automated data scraping and reporting pipelines using Selenium, APIs, Google Sheets, and n8n.

MERN STACK DEVELOPER

Hostup Cloud Technologies Pvt Ltd, Bengaluru

May 2025 – July 2025

- Developed an EdTech platform using React.js and Node.js for tutor-student collaboration.
- Built a MERN-stack food ordering application with authentication and order tracking features.

Position of Responsibility

Ui path – Bot leader : Mentored fellow students in building automation bots using **RPA tools**, guiding them in designing workflows, integrating APIs, and automating repetitive tasks across platforms

Extra Curricular Achievements

Competitions and Awards	Finalist in Hackabot, a hackathon conducted by UiPath. Achieved 2nd place in an entrepreneurship-focused debate competition hosted by the Debating Society
-------------------------	---

Projects	Customer Churn Analysis (Python, Matplotlib, Seaborn) Conducted Exploratory Data Analysis (EDA) on customer churn data to identify key retention drivers, analyzing demographics, tenure, contract types, and payment methods to uncover patterns influencing customer behavior. Airline Authority Analysis (Power BI) Cleaned and standardized large-scale flight delay datasets to ensure accuracy, consistency, and analytical usability, and developed an interactive dashboard to analyze weekly, monthly, and yearly flight delay trends. SQL Music Industry Analysis Designed and optimized databases to analyze sales, customer demographics, and inventory. Applied joins, subqueries, and window functions to uncover trends, seasonal patterns, and KPIs like revenue growth and retention. Google Ads Dashboard (Google Data Studio) – Built a custom dashboard to track CTR, impressions, and group IDs, offering quick insights into engagement, budget use, and ad performance for better marketing decisions. Order Quantity Performance Dashboard Built a KPI-driven dashboard to track order quantities by customers, products, and months, visualizing performance metrics like OT% and IF% for supply chain optimization. Airbnb Data Analysis Dashboard Created a dynamic dashboard to analyze Airbnb listings by room type, location, host activity, and pricing trends, providing actionable insights for occupancy and revenue management.
-----------------	--

Additional Information

Languages Known	English (Proficient), Hindi (Intermediate)
Computer Proficiency	Power BI - Data Modelling, DAX, Dashboards and Power Query Excel-Pivots, Charts, Look ups and Power Query Java(intermediate level) NodeJs SQL-DML, DDI, CTE, Aggregate Functions and Window Functions. Power - Data Modelling, DAX, Dashboards and Power Query BI ReactJS Javascript MongoDB

Declaration

I Ishita certify that to the best of my knowledge and belief, the information provided above accurately describes my qualifications, experience, and personal details..
